

## POSTER TOUR

Group I.		
Group I.		Chairs: Rafaella Manna, Erbil Ünsal
PP-03	Bourguiba Rim	Familial Mediterranean Fever Associated Pericarditis and Pericardial Tamponade: A Systematic Review of 239 cases.
PP-04	Bourguiba Rim	Peritoneal Mesothelioma complicating Familial Mediterranean Fever has a high mortality: a Case Serie of 10 cases including 5 French cases and Literature Review
PP-07	Ece Aslan	Non-Autoinflammatory Diseases Mimicking Familial Mediterranean Fever: A Case Series
PP-14	Serpil Meric Toprak	Prediction of Homozygous M694V Variation in Pediatric Familial Mediterranean Fever Using Explainable Ensemble Machine Learning

Group II.		
Group II.		Chairs: Isabelle Kone-Paut, Hakan Babaoğlu
PP-05	Cansu Sahin	Does Long-Term Anakinra Treatment Increase the Risk of Infections and Tuberculosis in Patients with Familial Mediterranean Fever?
PP-11	Rabia Deniz	Phenotypic Differences Between Familial Mediterranean Fever Patients with Pathogenic MEFV Variants and "Familial Mediterranean Fever-like" Patients with no MEFV Variants: Are They Really Same?
PP-12	Mehmet Orhan	Evaluation of Damage Development in Pediatric Autoinflammatory Diseases: An Interim Analysis of a Single-Center Cohort
PP-15	Zhicheng Zhou	Multi-omics stratification of FMF attacks distinguishes bi-allelic from heterozygous patients through IL-18/S100 biomarkers
PP-30	Gizem Dayı	Prevalence, Clinical and Genetic Characteristics, and Treatment Responses of Hidradenitis Suppurativa in Patients with Familial Mediterranean Fever

Group III.		
Group III.		Chairs: Halide Özge Başaran, Piero Portincasa
PP-01	Yiğit Çamur	Five-year follow-up of anakinra treatment in familial mediterranean fever: a retrospective single-center study
PP-06	Cristina Lavilla Olleros	Iron Restriction Phenotypes and Their Impact on Clinical Outcomes in Familial Mediterranean Fever: A Iron Restriction Phenotypes and Their Impact on Clinical Outcomes in Familial Mediterranean Fever: A Prospective Study of 161 Adults. Prospective Study of 161 Adults.
PP-08	GÜLŞAH PİRİM	Long-Term Clinical Relevance of Heterozygous Pathogenic Mefv Variants in Pediatric FMF: Evidence From Proteinuria and Disease Course
PP-16	Üçler Can Ateş	The Impact of Colchicine Resistance and Comorbidities on Biological Treatment Selection in Familial Mediterranean Fever: A Single-Center Retrospective Study
PP-21	Aziz Kutay Özcan	Men's health in familial mediterranean fever: a prospective questionnaire-based screening

Group IV.		
Group IV.		Chairs: Gizem Ayan, Yelda Bilginer
PP-02	Abdullah Yusuf Istanbulu	Focal Segmental Glomerulosclerosis (FSGS) Developing on the Background of Familial Mediterranean Fever (FMF): A Single-Center Experience
PP-09	Nergis Akay	Canakinumab Therapy in Colchicine-Resistant Familial Mediterranean Fever: Real-World Outcomes and Predictors of Dose Optimization
PP-10	Zeynep Torunoğlu	Long-term outcomes of transition from pediatric to adult care in familial mediterranean fever: a comparative analysis of clinical and treatment characteristics
PP-17	Zeynep Torunoglu	Clinical Phenotype Evolution from Childhood to Adolescence in Familial Mediterranean Fever: A Retrospective Cohort Study
PP-13	Sara Benchekroun-Jolicoeur	Mortality in familial Mediterranean fever: a single-center cohort study of 911 patients and causes-of-death analysis

## POSTER PRESENTATIONS

No	Presenter	Abstract Title
PP-18	Alina Sukhanina	Association Between Clinical Manifestations and Laboratory Markers in Patients with Familial Mediterranean Fever
PP-19	Ayşe Elif Boncukcuoğlu	MEFV-associated palindromic-like arthritis: a pyrin-related autoinflammatory phenotype or a subtype of palindromic rheumatism?
PP-20	Ayşenur Doğru Kılınc	Peripheral and Retinal Microvascular Alterations in Pediatric Familial Mediterranean Fever According to Colchicine Response
PP-22	Banu Çiçek Yalçın Dulundu	Silent FMF
PP-23	Beste Acar	Dietary Patterns and Disease Activity in Familial Mediterranean Fever: A Cross-Sectional Study
PP-24	Betül Sözeri	Frequency of Lower Respiratory Tract Infections in Pediatric Patients Diagnosed with Familial Mediterranean Fever Under Canakinumab Therapy
PP-25	Büşra Başer Taşkın	Quantifying intrafamilial concordance in familial Mediterranean fever: a pairwise sibling analysis using kappa and intraclass correlation
PP-26	Catherine Grandpeix-Guyodo	Instagram as an Educational Platform for Familial Mediterranean Fever: A 33-Month Experience
PP-27	Ender İgneci	Adult secondary hemophagocytic lymphohistiocytosis/macrophage activation syndrome cases: diagnostic criteria and mortality-associated factors across diverse triggers – a single-centre case series
PP-28	Eray Tunce	Evaluation of adherence to colchicine therapy in pediatric patients with familial Mediterranean fever
PP-29	Fedorov Evgeny S.	Hepatosplenic syndrome in patients with familial mediterranean fever (FMF) in a Russian cohort.
PP-31	Hacer Öztürk Aydın	Incidence and Distribution of Newly Diagnosed Autoinflammatory Diseases: A Five-Year Analysis with a Focus on Familial Mediterranean Fever
PP-32	Ilenia Di Cola	Folate deficiency in familial Mediterranean fever patients: a cohort of 160 adults

PP - 33	Mehmet Orhan Erkan	Evaluation of Self-Management, Transition Readiness, and Psychosocial Risks in Adolescents with Familial Mediterranean Fever
PP - 34	Neslihan Kara Çanlıoğlu	Medication adherence in pediatric familial Mediterranean fever: The impact of disease severity and anti-interleukin-1 therapy
PP - 35	Ozge Gucenmez	Clinical Comparison of Homozygous and Compound Heterozygous MEFV Mutations in Childhood FMF: A Single-Center Experience
PP - 36	Ozlem Necipoglu Banak	NLRP12 variants in pediatric patients: a single-center experience
PP - 37	Pınar Prencuva Akyürek	Temporal changes in diagnosis and management of pediatric familial mediterranean fever: a 25-year single-center cohort study
PP - 38	Rabia Deniz	Comparison of Efficacy and Safety of Colchicine and Interleukin-1 Inhibitors in Familial Mediterranean Fever Patients with Pathogenic MEFV Variants and "Familial Mediterranean Fever-like" Patients with no MEFV Variants
PP - 39	Rabia Deniz	Neurocognitive Effects of Long-Term Colchicine Use in Patients with Familial Mediterranean Fever and Gout
PP - 40	Rabia Deniz	Non-NLRP3 NLR Variants Define an Overlapping Autoinflammatory Spectrum with Prominent Mucocutaneous Involvement
PP - 41	Sercan Gücenmez	THE EFFECT OF MEDITERRANEAN DIET ADHERENCE ON DIETARY INTAKE AND QUALITY OF LIFE IN ADULTS WITH FAMILIAL MEDITERRANEAN FEVER
PP - 42	Sıla Atamyıldız Uçar	Experience of Anakinra Treatment Practices in Colchicine-Resistant Familial Mediterranean Fever: An International Survey of Pediatric Rheumatologists on behalf of the PReS AID-WP and the Turkish Pediatric Rheumatology Association
PP - 43	Stepanenko Natalia	Psychological disturbance in children with familial Mediterranean fever (FMF)
PP - 44	Vita Giordano	Elevated Serum Zonulin and Impaired Intestinal Barrier Integrity in Familial Mediterranean Fever (FMF): In Vitro Evidence
PP - 45	Aida Shikhaliyeva	Deficiency of Adenosine Deaminase 2 Presenting with Sequential Sudden Sensorineural Hearing Loss and Behçet-like Features in a Young Adult
PP - 46	AKIN ISIK	A Case of Disseminated Extrapulmonary Tuberculosis Developing Under Anti-TNF Therapy Despite Prior Isoniazid Prophylaxis
PP - 47	Andaç Komaç	Combination biologic therapy in the coexistence of familial mediterranean fever and psoriatic spondylitis: a case report
PP - 48	Aysegül Avcu	Recurrent Febrile Arthritic Attacks as a Hemato-Inflammatory Manifestation of Clonal Myeloid Disease
PP - 49	Aysenur Yılmaz	Amyloid storm in familial Mediterranean fever: rebound inflammation following IL-1 withdrawal and implications for graft survival
PP - 50	Aziz Kutay Özcan	TNFRSF1A p.Arg121Gln-associated TRAPS with functional IL-1 $\beta$ hyperproduction misdiagnosed as familial mediterranean fever: a case report
PP - 51	Berna Yurttaş	Malignant mesothelioma mimicking familial Mediterranean fever: a case report
PP - 52	Betül Dikkanoğlu Demirok	Familial Mediterranean Fever Coexisting With Inflammatory Bowel Disease: A Case Report
PP - 53	Burak Barış Öztürk	Fatal Secondary HLH/MAS Associated with CMV and Tuberculosis in an Immunosuppressed Patient
PP - 54	Cansu Sahin	Atypical and Divergent Autoinflammatory Phenotypes in Monozygotic Twin Sisters with MEFV and TNFRSF1A Variations
PP - 55	Erdem Bektas	Persistent Ascites in a Patient with Familial Mediterranean Fever Under Long-term Biologic Control
PP - 56	Ertugrul Cagri Bolek	Brown tumors in tertiary hyperparathyroidism complicating FMF-related amyloidosis in a patient on hemodialysis
PP - 57	Hasan Yardımcı	Concurrent Ocrelizumab and Anakinra in Colchicine-Resistant Familial Mediterranean Fever and Secondary Progressive Multiple Sclerosis: A Novel Case Report with 39-Month Follow-Up
PP - 58	Melodi Gizem Can	Refractory Inflammation, Cytopenias, and Polychondritis: A Diagnostic Challenge Leading to VEXAS Syndrome
PP - 59	Meryem Can	Colchicine toxicity without marked CK elevation: a diagnostic pitfall induced by clarithromycin
PP - 60	Meryem Can	From polyarthritis nodosa to familial mediterranean fever: a missed diagnosis leading to AA amyloidosis and cardiac involvement
PP - 61	Serpil Ergulu Esmen	FDG-Avid pulmonary AA amyloidosis: A diagnostic pitfall with a favorable clinical course
PP - 62	Serpil Ergulu Esmen	Persistent inflammation after renal transplantation in FMF-associated AA amyloidosis looking beyond autoinflammation reveals Crohn's disease
PP - 63	Serpil Ergulu Esmen	Silent inflammation leading to AA amyloidosis: an atypical presentation with MEFV variants and response to canakinumab
PP - 64	Serpil Ergulu Esmen	Late-onset AA amyloidosis associated with LPIN2 and MEFV variants presenting with nephrotic-range proteinuria
PP - 65	Sevilay Batıbay	Discordant amyloid typing between bone marrow and kidney in a patient with multiple myeloma: a diagnostic challenge
PP - 66	Sibel Zaralı	Radyofrekans Ablasyon Sonrası Gelişen Dirençli ve Tekrarlayan Perikardiyal Efüzyon
PP - 67	Turan Güzel	Challenging Cases with Severe Gastrointestinal Involvement in IgA Vasculitis
PP - 68	Zeynel Abidin Akar	Tuberculous Lymphadenitis During Canakinumab Therapy in a Patient with Familial Mediterranean Fever: A Case Report with Subsequent Perimyocarditis and Spondyloarthritis
PP - 69	Zeynep Tüzün	Suspected Spondylodiscitis in a Patient with FMF and a History of Brucella Infection: A Diagnostic Dilemma
PP - 70	Svetlana Salugina	Genotype-phenotype associations in familial mediterranean fever: a russian cohort study
PP - 71	Aylin Kucukali	A kidney transplant patient presenting with chronic monoarthritis: an unusual manifestation of AA amyloidosis associated with familial mediterranean fever
